REMARKS

Applicant respectfully requests reconsideration of this application. Claims 1-19 are pending. Claims 1, 8, 11, 14, and 17 have been amended. Claim 4 has been cancelled. Therefore, claims 1-3 and 5-19 are now presented for examination.

Claim Rejections under 35 U.S.C. § 112

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which application regards as the invention.

In addition to the previous amendments, independent claims 1, 8, 11, 14, and 17 have been amended to incorporate subject matter from claim 4, which has been cancelled. By the amendments, the claims provide that simulation of a circuit switched call link to user equipment is provided utilizing application layer object code built over a GSM protocol stack, the application layer object code being configured to handle incoming AT commands from the user equipment and to handle simulation of the circuit switched call link to the user equipment.

It is submitted that such elements are novel and patentable, and that the subject matter of the invention has been particularly pointed out and distinctly claimed.

Terminal Disclaimer

A terminal disclaimer has been provided to disclaim the terminal part of any patent issued from U.S. Application Serial No. 09/0398,724. This terminal disclaimer is in addition to the terminal disclaimer of U.S. Patent No. 6,363,335 filed on March 4, 2003.

Docket No: 42P11599   - 9 -
Application No.: 09/400,624

Drawings

Corrections have been made to Figures 10 and 15C.

Conclusion

Applicant respectfully submits that the rejections have been overcome by the

Amendment and Remark, and that the claims are in condition for allowance.

Accordingly, Applicant respectfully requests the objections and rejections be withdrawn

and the claims be allowed.
